

Plant Botanical Name:

Gelsemium sempervirens

USBG Plant Location:

Bartholdi Park
National Garden

Sunlight:

Full sun to part shade

Plant Soil Type:

Very adaptable

Plant Moisture Requirements:

Moderate to low

A favorite native vine for gardeners in the south and eastern United States, Carolina jessamine has masses of fragrant yellow flowers in the spring. This evergreen shrub is resistant to most pests, adapts to almost any soil, and can be used as groundcover or grown over fences, walls, or trellises. Deer do not favor it but butterflies and hummingbirds are attracted to the flowers.
